

# Free Accessibility

Jan Buchal

*Brailcom, o.p.s.*

## **Free Accessibility – efficient help to a wide group of physically**

handicapped

- What is the Accessibility?
- What is the Free Accessibility?

## Overcoming the barriers

- Increased effort
- Special aids

## **Accessible computers**

- A set of smaller and greater aids
- Special software
- Special hardware

## **What is the Accessibility?**

Accessibility makes it possible, for a man, to use a thing (a computer in our case) in spite of the fact that he is either totally blind or has a seriously damaged vision.

## The Paradox of Accessibility

- Accessibility creates new barriers
- Accessibility becomes inaccessible

## The Ill Accessibility

- Financially inaccessible
- Patents
- No modifications possible

## **Who suffers from the disease of Accessibility**

- Those, for whom it is meant!

## **The economical handicap of the impaired**

- Insufficient purchasing power
- Dependence on donations and government subventions

## **Accessibility in the trap of patents and licences**

- Only the patent owner can produce
- The owner decides the price

## **Accessibility – the subject of a business**

- Demand/supply
- Profit, the purpose of business

## **The cure for an ill Accessibility**

- Free Accessibility
- Free licences

## **Free Accessibility and the balance**

- Nothing is for free
- Natural financing

## **Free Accessibility and volunteers**

- Volunteers help significantly
- Volunteers are not enough
- Qualified, stable teams

## How can we help?

- Consideration
- Public education
- Looking for the possibilities of financial funding for the Free Accessibility

## Free Accessibility – conclusion

- Accessibility should help the handicapped
- Handicapped Accessibility
- Patents, restrictive licences
- Accessibility, the subject of the business – weak purchasing power
- The cure for the ill Accessibility – free licences
- Natural financing
- Material support for the Free Accessibility
- Volunteers and Free Accessibility
